

MULTIFUNCTIONAL SCENTED SPHERES

Cotton Flower

Multifunctional scented spheres to perfume small spaces such as wardrobes, drawers, sports bags or the clothes in the tumble dryer!

Their spheric form and the ample contact surface deriving from the linear incisions are perfect to evenly release the scent during the drying cycle and facilitate the passage of hot air.

In effect the spheres are free to move in the tumble dryer and among the clothes. Therefore the fragrance is released on the entire surface of the garments.

**LONG
LASTING**
