

# HygienFresh® PreZym

The enzymatic pre-treatment  
for a wide range of stains

# THE REVOLUTIONARY PRETREATMENT

HygienFresh® PreZym is the revolutionary professional laundry pretreatment with triple action.

*PreZym, with its **bi-enzymatic concentrated** formulation, together with degreasing surfactants, is active against a wide range of stains.*

**Handy, fast, unbeatable...**

**Winning triple  
action!!!**

# THE MOST COMPLETE PRETREATMENT

The protease and amylase enzymes in the product, act in synergy against dirt and the toughest protein and starch stains. The surfactants completes its range of action.

***The result is an active pretreatment against all kinds of stains.***

## Protease

These enzymes remove protein based stains.

They're active on:

*Blood, chocolate, sauces, food stains, eggs, milk, ice-cream, etc..*

## Amylase

These enzymes remove starch based stains. They're active on:

*Rice, baby food, grass, chocolate, potatoes, etc..*

## Surfactants

They dissolve and eliminate greasy dirt.

They're active on:

*Oil, fat food, soil, engine oil, tar, wax, etc.*

# THE ENZYMES

Enzymes are complex macromolecules consisting usually of proteins. Enzymes catalyse (i.e. speed up) a degradation reaction.

As catalysts their effectiveness does not decrease. The only limiting parameters are the quantity of the substrate (the stain) and the time required to react.

**Activate them by adding water and providing heat. The elimination reaction starts until the complete removal!**
