Physical protection
rainwear, protective equipment must be selected depending on the concentration and amount of hazardous substance in the workplace.

Respiratory protection
For low exposure levels to use respirators for dusts of P95 (US) type or of type P1 (EU EN 143). For most high security levels use cartridge type respirators OV/AG/P99 or ABEK-type P2 (EU EN 143). Use respirators and components tested and approved by the relevant standardisation bodies, such as the NIOSH (U.S.A.) CEN (EU).

Environmental exposure controls
Avoid spills or leaks, if this can be done without danger. Do not let product enter drains. The dump into the environment must be avoided.
